

ACORD 402 (2016/03) - AGRICULTURE PROPERTY SECTION

ACORD 402, Agriculture Property Section, is designed to handle the basic underwriting and rating needs for Agriculture property exposures.

The Property Section accommodates five separate premises.

This form was designed to be used in conjunction with ACORD 401, Agriculture Application - Applicant Information Section. Much of the information for the Identification Section should match the data found within the Applicant Information Section of ACORD 401. Even though this data matches the data on ACORD 401, it is still important to complete it. Many companies separate the applications by sub-line of business for rating purposes. Not completing this portion of the application makes it difficult to keep track of the full account.
